Research Interests

Sequence Modeling, LLMs for Code, Low-Resource ML, Representation Learning, Domain Generalization

Education

- **BITS Pilani K K Birla Goa Campus** — Goa, India
  B.E.(hons.) - Electrical and Electronics Engineering; Minor in Data Science; CGPA: 8.38 — *2021 - 2025*
  Courses: *Machine Learning, LLMs, Foundations of Data Science, Optimization, Deep Learning, Applied Statistical Methods*

Experience

- **Microsoft** — Bengaluru, India
  Research Fellow – PROSE Team — *July 2025 - present*
  - Working on applications of LLMs to code and Spreadsheet environments in the PROSE team
  - Authored a benchmark and framework for evaluating next-action prediction in spreadsheets (**ICML 2026**)
- **CSALT Lab, IIT Bombay** — Mumbai, India
  Research Intern — *May 2024 - August 2024*
  - Selected by IKDD (India chapter of ACM SIGKDD) as one of 11 students nationally for the Uplink Research Internship
  - Advanced ASR systems on low-resource accented speech under the guidance of Prof. Preethi Jyothi
  - Used Task Vector-based model-merging methods to get improved zero-shot performance on unseen accents
- **APPCAIR** — Goa, India
  Student Researcher — *July 2023 - May 2024*
  - Worked under the guidance of Prof. Ashwin Srinivasan, Dr. Lovekesh Vig and Dr. Gautam Shroff
  - Designed multi-agent LLM debate simulations to probe argumentative reasoning failures
  - Extended CRMs, a form of 'explainable neural networks', to learn priors over molecule synthesis data using Autoencoders in a self-supervised manner

Publications

- **A Benchmark and Framework for Evaluating Next Action Predictions in Spreadsheets**:
  ◦ Accepted at **ICML 2026**
  ◦ Introduces a benchmark and evaluation framework for measuring a solver's ability to predict the next user action in a spreadsheet setting
- **CountCLIP [GitHub] [arXiv]**:
  ◦ Reproduction of ICCV 2023 paper *Teaching CLIP to Count to Ten*; released the previously unavailable implementation and the specialized dataset open-source

Projects

- **Titans for Squared Amplitude Calculation [GitHub]**:
  ◦ Compared the performance of a standard T5 transformer model against the more advanced Titans architecture for calculating squared amplitudes in particle physics
- **Graphormer Blogpost [link]**:
  ◦ Accepted at the blogpost track of the GRAM Workshop @ **ICML 2024**
  ◦ An introductory blog post for understanding the fundamentals of the NeurIPS 2021 paper *Graphormer*
- **Rank-N-Contrast for graphs [GitHub]**:
  ◦ Reproduction of the NeurIPS 2023 Spotlight *Rank-N-Contrast*; evaluated its performance on graph regression tasks

Awards

- **IKDD Uplink Research Internship (2024)**: Selected as one of 11 students nationally for a research internship at an IIT
- **Google DeepMind AI Symposium (2025)**: Invited attendee (∼75 students selected nationally)
- **Moveworks AI Hackathon (2023)**: 2nd place out of 20 teams (∼80 participants) in an overnight LLM hackathon

Skills Summary

- **Concepts**: LLMs, Program Synthesis, Transformers, NLP, Computer Vision, ASR
- **Languages/Frameworks**: Python, PyTorch, Hugging Face, LangChain, NumPy, Pandas, Scikit-learn

Volunteering

- **SAiDL**: Core Member of SAiDL (12 members); organizer for events such as the AI Symposium and Google's AI Booth
- **Instructor**: Taught student-run courses on Intro to ML and Intro to DL under SAiDL
- **Teaching Assistant**: FDCM for CS F437 GenAI at BITS Pilani Goa
